Tourism and City Exploration

Description:

A web application that enables users to explore and make online booking of the various tour destinations along with accessing the map location of that point which will help them in making the guidance throughout the journey along with this they are able to make booking of the packages online by entering the details. Users are allowed to make registration before using the application as it is completely secure often an password hashing method has been used in this so no need to worry related to the security

In this project HERE location map services has been provided it is very interactive and offers guided tour as well as the actual areas and the region of the place it will show in exploring the city.

Impact :

Users irrespective of any age are comfortable to make the booking online without any harassment because it is very easy in use and very helpful in exploring the city.

THE PROBLEM:
